FREE STATE PROVINCE

# Free State Provincial TB Progress Report

## 1. Demographic Information:

Names of Districts	Population per District	Number of Sub-districts	Number of Facilities (According to DHIS)	Number of reporting units that rendering TB services (As in the ETR.Net)	Reporting Units (ETR.Net) excluding decommissioned units	Number of Laboratories offering TB services	Number of Culture & DST* services	Number of Facilities implementing TB/HIV integrated services
Xhariep	142 607	3	36	42	38	0	0	37
Motheo	813 576	3	84	90	81	2	1	87
Lejweleputswa	694 198	5	71	82	79	1	0	71
Thabo Mofutsanyana	767 676	5	87	102	96	2	0	96
Fezile Dabi	499 870	4	56	76	59	1	0	57
<b>Free State</b>	<b>12 917 921</b>	<b>20</b>	<b>334</b>	<b>392</b>	<b>353</b>	<b>6</b>	<b>1</b>	<b>348</b>

\* DST = Drug Susceptibility Testing

Distribution of Health Facilities (Rendering TB Services – the total of these needs to tally the above ‘number of facilities – rendering TB services’)

Names of Districts	Number of Clinics (incl Satellite Clinics)	Number of Mobiles	Number of CHC's	Number of Public Hospitals	Number of NGO Facilities	Number of Private Facilities	Number of **other facilities	Number of MDR-TB units	Total
Xhariep	16	20	2	3	0	0	2	0	43
Motheo	53	13	2	7	0	0	7	1	83
Lejweleputswa	46	8	1	6	0	0	10	1	72
Thabo Mofutsanyana	64	19	1	10	0	0	2	0	96
Fezile Dabi	35	16	5	6	0	1	8	0	71
<b>Free State</b>	<b>214</b>	<b>76</b>	<b>11</b>	<b>32</b>	<b>0</b>	<b>1</b>	<b>29</b>	<b>2</b>	<b>365</b>

\*\* Other includes: Correctional Services; Mines and SAMS (SANDF)

### Comment:

- Bloemfontein, Botshabelo and Bloemfontein forms the new Mangaung Metro, The Mangaung Metro will be a stand-alone district replacing Motheo district without the two local areas Mantsopa and Naledi. The two local areas will be added to Thabo Mofutsanyana and Xhariep respectively.

<sup>1</sup> Population figure according to HISP midyear estimates 2011

## Suspects:

Total number of outpatients attendance (Headcount) (>5 years)	4/2011		1/2012		2/2012	
	Number	%	Number	%	Number	%
	1,696,078		1,651,203		2,309,428	
Number (%) screened people	-	-	-	-	-	-
Number (%) suspects	43,244	3%	63,184	3.8%	93,781	4.1%
Number (%) suspects tested	34,037	79%	31,837	50.4%	28,636	30.5%
Number (%) positive	2,848	8.4%	3,243	10.2%	2,910	10.2%
Number (%) on treatment	2,498	88%	2,518	77.6%	2,288	78.6%
Number died before treatment started	55	1.9%	67	2.1%	92	3.2%
SS+ primary defaulters	119	4%	145	4.5%	123	4.2%

## Comment:

- Low reporting rate influence the information negatively.
- No information of what happened to 407 (14%) of the patients we could not account for as districts did not indicate it.
- Monitoring of intensified case finding is difficult as a result of use of several tools to collect the data. The provincial office updated the facility TB information record keeping system to incorporate intensified case finding data monthly.

## a. Case Findings:

### Case Finding Summary by Quarter All TB Cases, distributed by Disease Type FREE STATE Quarter 3 of 2011 to Quarter 2 of 2012

**Comment:**

- Motheo district structure will change as Mangaung metro will form a standalone district called Mangaung.
- Motheo district is representing 33% and Lejweleputswa district 26% respectably of Free State's case finding data, with Mangaung Metro representing 93% of Motheo district's TB caseload for the second quarter.

**Achievement:**

- XPert MTB/RIF examination started 11 May 2012 in Pelonomi laboratory (Bloemfontein). Maluti a Phofung local area is the only area in the Free State that is not accessing the GeneXpert machines for TB sputum testing.

**Challenges:**

- Case Finding has decreased generally in all the 5 districts. Follow up will be done to ensure that all cases to be captured.
- Bacteriological coverage decreased and a follow-up in-service training will be done to ensure the taking of sputa to identify infectious and monitor TB.
- Follow-up if all TB patients that are diagnosed and started on TB treatment within the ART services are captured.

**Smear Conversion Rates:**

**Sputum Conversion Summary by Quarter**  
**New Cases**

**Comment:**

- Free State cure rate noticeable decrease from the previous quarter to 69.9% range from 77.9% for Thabo Mofutsanyana district to 64.1% in Motheo district, with a higher treatment completion rate of 5.7% compare to the previous quarter 4.9%.
- The defaulter rate for new ss+ TB patients is at 4.4% with a range of 2.8% in Thabo Mofutsanyana district to 6.2% in Motheo district.

**Challenges:**

- Free State's death rate increase dramatically at 11.9%, range 13.5% in Thabo Mofutsanyana to 9.3% in Motheo, from the previous quarter

**General Notes:****1. Laboratory Services****Sputum Turn Around times (TAT)**

Turn Around Time - Quarter 2/2012						
Name of district	Number of facilities	Number of facilities with TAT within 48 hours		Number of specimen	Number of specimen within 48 hours	
Xhariep	38	10	26.3%	3 193	1 729	54.2%
Motheo	81	33	40.7%	11 416	8 096	70.9%
Lejweleputswa	79	34	43.0%	14 969	13 201	88.2%
Thabo Mofutsanyane	97	38	39.2%	13 345	10 350	77.6%
Fezile Dabi	59	41	69.5%	8 775	7 235	82.5%
<b>Free State</b>	<b>354</b>	<b>156</b>	<b>44.1%</b>	<b>51 698</b>	<b>40 611</b>	<b>78.6%</b>

**Challenge:**

- The turnaround time decreased from the previous quarter with no explanation. Investigation is being done and miscalculation of TAT at facility level could be one of the reasons.

## 2. Direct Observed Treatment (DOT) Coverage:

Quarter 2 of 2012	Number	%
<b>DOT Reporting Rate:</b> Facilities providing DOT	<b>299/353</b>	<b>85%</b>

DOT Coverage		Quarter 2/2012	
Numerator	Denominator	Indicator	
Number of all TB patients on DOT	Total number of all TB patients on treatment	Proportion of all TB patients on DOT	
8,233	9,910	83.5%	
Number of Patients on DOT			Total
Intensive Phase		Continuation Phase	
Facility	Community	Facility	Community
2,081	1,423	1,324	3,405
			8,233

### Challenge

- Very low reporting rate for DOT was experienced.

## 3. NGO's (Funded by National Department of Health)

Name of NGO	Brief description of activities done by NGO	Type of training s done	Number of trainings done (Sessions/ Participants)	Number of patient's seen by NGO	TB/HIV integration Yes/No	Budget Approved	% Expend iture
<b>Clinical:</b>							
<b>Non-Clinical:</b>							
PPHC	Payment of CHW						
LAMP	Payment of CHW						
HEAPS	ACSM on TB-HIV						
SANTA	Tracing of defaulters & ACSM activities						
Epilepsy SA	Payment of CHW						
Hospice	Payment of CHW						

### Comment:

- No changes in funding of NGO's.

## 4. Advocacy, Communication and Social Mobilisation (ACSM)

1. Visit to patient's home from Freedom Square on the 11 April 2012. Walked 5 km with Gerry the TB Ambassador.
2. About 50 people participated in the walk.
3. Media Briefing was held at 18:00, Southern Sun Hotel after the patient's visit.

4. Walk for Humanity in partnership with Red Cross, Denosa, Post Office, SANTACO and FS DoH. Ten km walk was conducted on the 13 April 2012. 300 people participated in the walk.
5. TB screening was done during Freedom Day Celebration on the 27 April 2012 at Bohlokong Stadium. **1220 people screened.**
6. Health Education conducted to 30 employees at the Post Bank.
7. TB Day Evaluation Meeting was held with all stakeholders that participated during TB Day Commemoration. Meeting held on the 11 May 2012.
8. 40 CHW from World Vision trained on TB ON THE 26 June 2012.

## 5. Drugs

### Comment:

- The provincial Depot has shortage in the (RH60/60) 28 pack size but other pack sizes are available with no patient interrupting treatment.
- Some facilities still have the children's (RHZ) combination to use with the booster dose INH.

## 6. TB-HIV Collaboration.

### TB-HIV Report:

Newly diagnosed TB cases (New & Re-treatment cases)	4/2011		1/2012		2/2012

<b>Total</b>	3837	2342	61.0%	1035	27.0%	182	4.7%	1942	82.9%	1722	73.5%	1429	83.0%	256	10.9%	1261	53.8%

**Comment:**

- As case finding data reporting is low the TB-HIV information is incomplete and influence the TB-HIV patients on ART negatively. Still are the total TB-HIV patients on ART higher than the previous quarter with ranges of 65.9% for Thabo Mofutsanyana district and 44.2% for Lejweleputswa district.
- Patients on IPT according to DHIS 10,980.

#### 7. TB amongst Health Care workers (HCW): 2/2012

District	Number of HCW diagnosed with TB	Number of HCW diagnosed with MDR-TB	Categories of staff
Xhariep			
Motheo	2		Doctor, Professional Nurse
Lejweleputswa			
Thabo Mofutsanyana			
Fezile Dabi			
<b>Provincial Total</b>	<b>2</b>		

**Comment:**

- The University of Colombia in collaboration with department of Health and Free State University want to research at the notification of health care workers and establish Occupation Health Clinics for TB and HIV positive people to received their treatment at the workplace without cost implications (ART)

#### 8. Training 2/2012

Target group	Categories	Number trained
Professional health care workers	Professional Nurses	235
	Doctors	31
	Infection control officers	0
	Environmental health officers	0
	Managers	38
	Other	51
Non-professional health care workers	DOT supporters	0
	Home based carers	0
	Lay counsellors	0
	Community Care Givers	10
<b>Total</b>		<b>365</b>

**Comment:**

- Doctors in hospitals and primary health care facilities received training on the use of the XPert MTB/RIF diagnostic method.

**9. Research**

	Topic	By Whom	Impact / Finding
Done:	1. Palsa plus	UCT & MRC	TB-HIV integration improves training method. Awaiting final report
	2. TB Operational Research- 'Early case detection'	Provincial TB Dept with district facilities support	More patients traced by testing sputa of all patients coughing 2 weeks
	3. Defaulter study.	MRC	Identify true cause of default
	4. Analysis of the costing allocation of TB programme	WHO	Under budget for the TB programme and fragmentation
	5. Evaluation of the effectiveness of TB training	Free State Research Unit and Department of Health	To improve the training methods/ awaiting final report
	6. Quality of ETR.Net information	University of the Free State & DoH	80% of information is corresponding with the original information of the TB patients file.
On-going:	1. File investigation on XDR-TB patients	TASC TB - URC	Improve prevention of XDR-TB patients
	2. Finger printing of drug resistant TB patients' sputum to estimate link of infection. In Zastron (Mohokare sub-district)	Microbiologic section, University of the Free State and medical school	Improve contact tracing and monitor infection patents.
	3. TB-HIV data annualises to compare visibility	University of the Free State	Improve data quality feedback to districts were given.
	4. Non - uptake of VCT amongst TB patients	University of the Free State	Improve preventative treatment
	5. Compare the ETR.Net and ARV databases	UCT Lung Unit	Matching TB and ARV information to establish the patients' information correctness.
	6. Non-conversion at end of 2 months treatment	FSDoH TB Management & University of the Free State	To improve conversion rate with new ss+ patients
	7. Impact Xpert on MTB/RIF on MDR-TB Outcomes	FSDoH Free State University & Microbiology & Virology	Impact of Xpert use on MDR-TB Outcomes
Planned research	1. DOT study	FSDoH research section	To improve DOT
	2. Community MDR-TB vs Hospitalisation of MDR-TB	FSDoH TB	Compare hospitalisation vs total community care
	3. Uptake of ART among illegible co-infected patients in integrated and non-integrated services	FSDoH TB & UFS	To improve integration between TB and HIV services
	4. TB patients uptake of IPTC	FSDoH & UFS	To increase the uptake of HIV testing rate among TB patients using several training methods
	5. TB in children – wrong treatment	FSDoH & Pelonomi Hospital	To determent the effective management of children with TB in the Free State.

**Comment:**

- ORAP 2012 is the Director Ms Tshidi Morigihlane the Free State TB Management representative with Dr Ulta Hallbower from Pelonomi Paediatrics and UFS as academic partner.
- The ORAP 2010 group submit a poster for the 43<sup>rd</sup> Union World Conference that was accepted on non-conversion. The poster will be presented under TB Management: lab monitoring & surveillance on 17/11/2012

## 10. General

- Some patients not taken smears and as a result of not standardised laboratory request forms are GeneXpert test done on sputum's during conversion and not a direct as requested- the issue have been taken up with the NHLS.
- Pelonomi Hospital started with GeneXpert testing in May 2012 and roll-out to Monapo Hospital laboratory is anticipated to be during August 2012.
